Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claim 28 is objected to because of the following informalities: Claim 28 has a typo, "28."

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pan (US 2004/0004753) in view of Huibers et al (6529310). For claims 1, 2, 27, 28, 39-41, 52, Pan discloses the general method for making a reflective spatial light modulator that involves bonding of the first substrate to a second substrate, see the abstract, and for steps of making a cavity and bonding techniques see sections [0014, 0062], but there is no consideration for concealing the hinge structure. Huibers et al in the abstract discuss concealing the hinge structure. It would have been obvious to one of ordinary skill in the art to hide the hinge structure in Pan because Huibers et al teach that this improves the fill factor. The various steps of creating the various layers and thickness are covered by Pan in the sections cited. The use of landing tips is well known in the art.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hornbeck (5583688) describe the use of landing tips (col. 2, line 5). Hornbeck (5600383) in col. 5, line 5 discusses the advantages of a hidden hinge structure.
